PROFESSIONAL SUMMARY

Highly analytical and visionary **Senior Laravel Backend Developer** with over 5 years of professional experience in architectural planning, building, and scaling high-performance enterprise web applications. Expert in the modern **PHP/Laravel** ecosystem, with deep mastery of **Eloquent ORM, MVC design patterns, Clean Architecture, and SOLID principles**. Proven track record of securing mission-critical applications through advanced multi-tier Authentication, designing highly optimal relational database schemas via **MySQL/PostgreSQL**, and orchestrating ultra-fast performance layers using **Redis, system caching, and asynchronous Laravel Queues**. Adept at managing third-party system integrations, Payment Gateways, and maintaining enterprise deployment pipelines on Linux servers.

TECHNICAL SKILLS

- **Core Backend Architecture:** PHP 8.3, Laravel 12, Eloquent ORM, MVC Architecture, Clean Architecture, SOLID Principles, C# / ASP.NET Core.
- **APIs & Secure Integrations:** RESTful APIs, Secure Handshakes, Payment Gateway Integrations, JWT, OAuth 2.0, Firebase, Postman.
- **Performance Optimization:** Redis Caching, Laravel Queues, Background Jobs, Database Indexing, Query Optimization.
- **Databases & Environments:** MySQL, PostgreSQL, Linux Environments, cPanel Server Deployment, Docker, Composer.
- **Methodologies & Testing:** Git, GitHub Version Control Workflows, PHPUnit, Agile/Scrum Development, Constructive Code Reviews.

PROJECTS & EXPERIENCE

Senior Backend Engineer

dhad.me & muqtabasat.com (Live Arabic Digital Production Platforms) | 2023 – Present

- Architected and scaled robust production server environments from inception, maintaining modular backend logic and high daily transaction availability.
- Designed and exposed high-security **RESTful APIs**, managing dense data streaming, deep middleware filtering, and complex token validations using Postman.

- Engineered advanced data concurrency configurations using **Redis caching**, multi-threaded **Background Jobs**, and **Laravel Queues** to optimize long-running system calculations without user-end delays.
- Applied strict version control pipelines, automated deployment routines, and wrote clean architectural documentation under strict Clean Architecture methodologies.

Senior Full-Stack & Laravel Developer

Enterprise Distribution & Logistics Infrastructure | 2022 – 2023

- Led the backend implementation and structural system tuning of an automated enterprise logistics engine utilizing **PHP Laravel and MySQL**.
- Modeled and optimized heavy database queries, structured database relational mapping via Eloquent, and secured data operations through SOLID principles.
- Integrated secure third-party communication channels and **Payment Gateways**, managing safe digital payment verification loops.
- Directed structured **Code Reviews** within the engineering team, validating technical testability (PHPUnit mindset), code maintainability, and clean formatting before deployment to Linux servers.

Backend Systems Engineer

AFAQ HADHRAMAUT Travel Reservation Platform | 2021 – 2022

- Authored central core reservation algorithms, ticket inventory management logic, and automated confirmation pipelines.
- Patched deep structural bugs and optimized slow relational tables, heavily reducing CPU and memory overhead during high-concurrency ticketing windows.

EDUCATION

Bachelor of Science (B.S.) in Computer Information Systems

AL-AHGAFF University, Hadhramaut, Yemen | 2019 – 2023

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
