Platforms & Production Sites: <https://dhad.me> | <http://muqtabasat.com>

PROFESSIONAL SUMMARY

Innovative and analytical **Full Stack Software Developer** with over 3 years of practical experience in designing enterprise web platforms and tailoring applications for the Arabic-speaking market. Proficient in backend engineering with **Python and FastAPI**, frontend development utilizing **React, TypeScript, and modern UI libraries**, and managing advanced relational data systems via **PostgreSQL**. Experienced in incorporating smart functionalities, handling dynamic document structures, and implementing asynchronous API communication. Proven track record of launching independent high-traffic Arabic platforms (dhad.me and muqtabasat.com), with a deep focus on writing clean, testable code, optimizing system performance, and ensuring secure application architecture.

TECHNICAL SKILLS

Backend Development: Python, FastAPI, Laravel, C#, PHP

Frontend Development: React, JavaScript, TypeScript, Shadcn UI, Vue.js 3, HTML5, CSS3, Tailwind CSS

AI & Integration Concepts: LLM APIs Consumption (OpenAI, etc.), Prompt Engineering, RAG (Retrieval-Augmented Generation), Content Generation Integration

Databases & Tools: PostgreSQL, MySQL, Git & GitHub, Version Control, Database Schema Design

Core Competencies: Full-Stack Product Management, Remote Team Collaboration, Clean Code Practices, Vulnerability Assessment, System Maintenance & Debugging

PROJECTS & EXPERIENCES

Lead Full-Stack Developer

dhad.me & muqtabasat.com (Live Arabic Web Platforms) | 2023 – Present

Engineered, launched, and managed end-to-end full-stack architectures for production-grade web applications tailored for Arabic text processing and interactive tools.

Authored clean, scalable backend business logic with **Python frameworks** and established optimized **PostgreSQL** data indexing schemas to accelerate text searching and information retrieval.

Developed responsive, user-friendly frontend interfaces incorporating core modular architectures, utilizing modern CSS utilities and JavaScript/TypeScript workflows to elevate end-user experience.

Researched and structured algorithmic workflows to facilitate intelligent content manipulation, dynamic generation, and data rendering for active end-users.

Full-Stack Developer

Enterprise Management & Document Distribution Platform | 2022 – 2023

Coordinated with technical teams to build a complete digital infrastructure using robust backend systems and reactive frontends to automate complex operational routines.

Engineered secure internal and external **RESTful APIs**, ensuring clean data pipelines, input validation, and secure authentication workflows.

Performed regular code reviews, maintained unit testing practices, and deployed performance optimization updates to reduce page latency and guarantee application stability.

Backend Developer

Multi-Module Operations Management System | 2021 – 2022

Designed structured database models and custom logic handlers to manage multi-tenant permissions and transaction sequences.
Provided system troubleshooting and implemented quick, smart bug fixes to minimize server downtime and ensure a continuous production cycle.

EDUCATION

Bachelor of Science (B.S.) in Computer Information Systems

AL-AHGAFF University, Hadhramaut, Yemen | 2019 – 2023

LANGUAGES

Arabic: Native (Expert in developing Arabic-first web applications)

English: Professional Working Proficiency
