PROFESSIONAL SUMMARY

Performance-driven **Full-Stack Software Engineer** with over 4 years of hands-on experience specializing in the **Python / Django** ecosystem with a strong backend emphasis. Proven track record of designing high-throughput RESTful APIs, optimizing database query latency, and building scalable B2B/marketplace features. Adept at managing full feature lifecycles—from architectural design and **PostgreSQL** schema modeling to front-end integration using **React** and cloud deployment. Experienced in low-latency system profiling, **Redis** caching, and integrating complex third-party supply services to drive reliability and seamless marketplace operations.

TECHNICAL SKILLS

Category	Core Competencies & Technologies
Backend Core	Python, Django, Django REST Framework (DRF), Asynchronous Tasks (Celery), API Design
Frontend Development	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Database & Caching	PostgreSQL, Query Optimization, Indexing, Redis (Caching, Queues, Pub/Sub)
Architecture & Integrations	B2B Marketplace Logic, Catalog/Supplier Integrations, Microservices, REST APIs

DevOps & Cloud	AWS, Docker, Git/GitHub Workflows, CI/CD Pipelines, Linux Administration
Testing & Performance	Unit/Integration Testing, API Response Profiling, Query Tuning, Low-Latency Architectures

PROFESSIONAL EXPERIENCE

Lead Full-Stack Software Engineer (Python / Django)

dhad.me & muqtabasat.com (Live Digital Platforms) | 2023 – Present

- Architected, shipped, and maintained full-stack production platforms using **Django** and **React**, managing end-to-end feature deployment and production monitoring.
- Optimized high-concurrency **RESTful APIs**, achieving low-latency response times through database index tuning, query optimization, and **Redis** caching layers.
- Engineered complex data models in **PostgreSQL**, implementing catalog search and dynamic item matching logic to ensure zero-downtime availability under heavy traffic.
- Built secure third-party integrations and payment/data handshakes while maintaining 100% test coverage for core business logic.

Backend-Strong Full-Stack Engineer

Enterprise Distribution & Marketplace Logistics | 2022 – 2023

- Designed and maintained backend microservices and catalog/inventory integration pipelines handling high-throughput supplier data feeds.
- Collaborated on front-end features using **React** to allow operational teams to monitor real-time marketplace analytics and supplier dispatch workflows.
- Reduced server response latencies by 35% through continuous profiling, eliminating N+1 query problems and optimizing **PostgreSQL** relational schemas.
- Utilized **Docker** and AWS tools to containerize services and streamline continuous integration and testing workflows.

Systems & API Engineer

AFAQ HADHRAMAUT Platform | 2021 – 2022

- Developed secure RESTful API endpoints for high-traffic reservation workflows, ensuring data integrity across complex transaction cycles.
- Conducted system debugging and performance tuning on relational databases to handle concurrent user spikes seamlessly.

KEY HIGHLIGHTS & PROJECTS

- **High-Performance Marketplace API Pipeline:** Designed a Python/Django API service that processes complex product search queries with sub-100ms latencies utilizing PostgreSQL spatial indexing and Redis.
- **Supplier & Catalog Integration Engine:** Built an automated ingestion engine that parses, validates, and normalizes supplier catalog data streams into unified relational schemas.

EDUCATION

Bachelor of Science (B.S.) in Computer Information Systems

AL-AHGAFF University, Hadhramaut, Yemen | 2019 – 2023

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
