PROFESSIONAL SUMMARY

Highly analytical and detail-oriented **Backend Developer** with over 3 years of practical experience designing, building, and optimizing robust server-side architectures. Proficient in engineering scalable enterprise applications using **PHP Laravel** and **ASP.NET Core / C#**, with an advanced capability to design secure, high-performance **RESTful APIs**. Expert in relational database management, schema normalization, and query performance tuning using **MySQL**, **PostgreSQL**, and **SQL Server**. Deeply committed to writing clean, maintainable code adhering strictly to **OOP** and **SOLID** principles. Proven track record of handling asynchronous processes, third-party integrations, and deploying active web products to production.

TECHNICAL SKILLS

- **Backend Development:** PHP Laravel, ASP.NET Core, C#, Python, FastAPI
- **API Architecture & Security:** RESTful APIs, JWT, OAuth 2.0, Secure Authentication Gateways, Third-Party API Integration
- **Databases & Caching:** MySQL, PostgreSQL, SQL Server, Redis, Database Optimization & Indexing
- **Advanced Mechanics:** Background Jobs, Queues & Listeners, Docker Containerization, Git & GitHub Version Control
- **Core Methodologies:** OOP, SOLID Principles, Code Reviewing, Clean & Testable Code, Requirements Analysis, Agile Teamwork

PROJECTS & EXPERIENCE

Lead Backend Engineer

dhad.me & muqtabasat.com (Live Arabic Production Platforms) | 2023 – Present

- Architected and deployed production-grade server ecosystems from scratch, maintaining end-to-end backend business logic and handling active daily transaction loads.
- Designed and exposed modular, highly secure **RESTful APIs** using structured routing, middleware filtration, and robust request-validation protocols.

- Modeled optimized **PostgreSQL and MySQL** database structures, utilizing indexing strategies and query refinement to maintain sub-second response times.
- Integrated asynchronous **Background Jobs and Queues** to handle long-running text processing and heavy calculations efficiently without stalling the main user workflow.
- Practiced strict version control workflows, automated deployments, and wrote extensive technical documentation for system architecture.

Backend / Full-Stack Developer

Enterprise Management & Distribution Infrastructure | 2022 – 2023

- Collaborated closely within a cross-functional development team to build an internal automation platform using **PHP Laravel** and robust data relational architectures.
- Developed internal secure data channels (APIs) utilizing **JWT token handshakes** to enable reliable multi-platform application communication.
- Conducted periodic **Code Reviews** within the technical team to ensure absolute alignment with clean coding practices, testability, and stability guidelines.
- Resolved complex backend bottlenecks and handled integration tasks with external enterprise logistics services.

Backend Developer

AFAQ HADHRAMAUT Travel Reservation Platform | 2021 – 2022

- Authored core scheduling algorithms, ticket booking management pipelines, and transactional safety routines using structured relational logging.
- Solved deep runtime errors, patched validation loopholes, and participated in Git-driven team feature implementations.

EDUCATION

Bachelor of Science (B.S.) in Computer Information Systems AL-AHGAFF University, Hadhramaut, Yemen | 2019 – 2023

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
